Tobacco-Use Prevention Education (TUPE) Tier 2 from the California Department of Education (CDE) September 26, 2023 Beyond the Bell/Division of Instruction

Action Proposed:

Approval to accept Tobacco-Use Prevention Education (TUPE) Tier 2 Grant from the California Department of Education (CDE) in the amount of \$1,786,028 for the 2023-24 school year, for an estimated total of \$5,358,084 over a three-year period. This grant goes into effect on July 1, 2023, and ends on June 30, 2026. Since this is a state grant, continual funding for the 2024-25 and 2025-26 academic years is contingent on the available funds in the state budget. This new grant will provide funding to continue prevention, intervention, and cessation services to address new tobacco and cannabis products (i.e., e-cigarettes and vaporizers) being aggressively advertised and made available to youth, and the health risks associated with these products at 81 school sites (25 middle and 56 high schools) located on 71 campuses.

Background:

Beyond the Bell Branch through the Tobacco-Use Prevention Education Tier 2 Grant previously adopted on October 6, 2020 (BR-049-20/21) provided prevention, intervention, and cessation services at 101 school sites (49 middle schools and 52 high schools) located on 94 campuses. The reduction in the number of school sites that will receive the services provided through the TUPE Grant in the 2023-24 school year is due to the decrease in funding awarded by the CDE to LAUSD. Schools selected for this proposal were those with the highest number of tobacco-related incidents and those that serve large populations of student groups with health disparities (low socioeconomic status, Hispanic/Latino, African American, LGBTQ+, foster youth and students experiencing homelessness).

Expected Outcomes:

If approved by the board, the Tobacco-Use Prevention Education (TUPE) Tier 2 Grant will allow District and school staff to provide support to students at 81 middle and high school sites with the following:

- prevention curriculum in health classes;
- brief intervention for students most likely to begin using tobacco and/or cannabis products;
- referral of students currently using tobacco and/or cannabis products to cessation services;
- development of student health advocates who will conduct anti-smoking/anti-vaping awareness campaigns;
- training of students as peer educators who will conduct classroom presentations on the harmful effects of tobacco/cannabis products; and
- educating parents/school community members and staff on the health risks associated with the usage of any tobacco/cannabis products (i.e., traditional cigarettes, electronic cigarettes/vaporizers, and hookah).

These components will impact approximately 15,000 school staff members, 11,000 parents and school community members, and 98,000 students, which will result in reductions in use of tobacco and cannabis products by students at the identified middle and high school sites.

Implementation of the TUPE Grant at 81 secondary school sites aligns with Pillar 2, Joy and Wellness, of the LAUSD 2022-2026 Strategic Plan. The services and activities that make up the program strongly promote Whole-Child Well-Being and Strong Social-Emotional Skills. Students receive instruction that is tobacco and cannabis-specific and research-validated through the Health Curriculum and the Stanford Medicine Tobacco Prevention Toolkit, *You and Me Together Vape Free*.

Furthermore, in collaboration with Student Health and Human Services, students observed using tobacco and/or cannabis receive brief intervention by mental health support staff or TUPE Liaisons at each participating school site, and are referred for cessation services, as needed, at community health organizations such as wellness centers and Kick It! California. These TUPE Program components provide services which promote whole-child wellness.

The youth development component within the TUPE Grant includes student leadership clubs where student health advocates plan and execute awareness campaigns and classroom presentations throughout their campuses. Through these presentations, students inform their peers about the harmful effects of tobacco and cannabis products, including e-cigarettes, vaping devices, and hookah. Students also spread a strong and positive message that promotes wellness and emphasizes the importance of healthy alternatives for dealing with stress. These leadership clubs provide students with the opportunity to learn leadership skills and positively impact the lives of their peers and their communities.

Board Options and Consequences:

If a “Yes” vote, Beyond the Bell Branch will continue to offer the TUPE prevention, intervention, and cessation services at the 25 middle school and 56 high school sites.

If a “No” vote, Beyond the Bell will not be able to continue to provide these services at the identified sites. Failure to approve the grant will reduce the restricted revenue available to fund these services by \$1,786,028 in the 2023-24 school year, and by a total of \$5,358,084 over a three-year period.

Policy Implications:

According to the National Library of Medicine (2018), “TUPE funding was associated with an increase in schools’ tobacco-specific prevention activities and these enhanced activities were associated with lower tobacco use among students.”

Budget Impact:

Approval to accept this grant will increase restricted revenue by the amount of \$1,786,028 in the 2023-24 school year, for an estimated total of \$5,358,084 over a three-year period. Matching funds are not required for this grant.

Student Impact:

Students will receive anti-tobacco/anti-cannabis messaging to educate them on the health risks associated with the usage of all tobacco and cannabis products (i.e., traditional cigarettes, electronic cigarettes/vaporizers, and hookah) which will reduce their likelihood of using these products. Approximately 98,000 students will benefit from the various components offered through the TUPE Grant.

File #: Rep-052-23/24, Version: 1

Equity Impact:

Component	Score	Rationale
Recognition	4	The TUPE Tier 2 Grant Program, by design, corrects specific historical inequities experienced by students who fall into one or more health disparity groups, which have been disproportionately affected by the negative health consequences of using tobacco and cannabis products (including vaping devices, e-cigarettes, and hookah). These health disparity groups include students who are socioeconomically disadvantaged, Hispanic/Latino, Black/African American, LGBTQ+, as well as students with disabilities, in foster care, or experiencing homelessness.
Resource Prioritization	4	Middle schools and high schools selected for the TUPE Tier 2 Grant Program serve large populations of students who fall into one or more health disparity groups. TUPE Liaisons (certificated staff) work with administrators, deans, counselors, psychiatric social workers, restorative practices coordinators, bilingual coordinators, and school climate advocates to identify students from health disparity groups and refer those observed using tobacco/cannabis products to appropriate support services such as wellness centers. TUPE Facilitators (staff from partner Community Based Organizations) actively recruit students from health disparity populations to participate in student advocacy groups (Advocates for Healthy Choices and Peer Educator Clubs).
Results	4	The TUPE Tier 2 Grant Program closes an opportunity gap by providing access to culturally responsive intervention and cessation services for students from health disparity populations and their families. Brief intervention is provided in a culturally sensitive manner and offered in languages other than English. TUPE Liaisons refer students to cessation services provided by community health organizations who are experienced in serving students and families from health disparity populations. Culturally responsive community health organizations and other anti-tobacco/anti-cannabis resources are identified through LAUSD's membership in the Coalition for a Tobacco-Free Los Angeles County, led by the Los Angeles County Department of Public Health. Through development of youth advocates from health disparity groups, culturally relevant anti-tobacco/anti-cannabis messages will be communicated peer-to-peer within these student populations.
TOTAL	12	

Issues and Analysis:

The TUPE youth advocacy and peer educator components play a major role in the district's student leadership programs. By providing expanded learning programs that are safe for students to participate in after school, we provide students the opportunities to engage in enrichment, recreation, and academic activities.
