CHRIS MOUNT-BENITES
Chief Financial Officer

A Message to the Board of Education of the Los Angeles Unified School District and the District's Taxpayers

I present to you the report of the Los Angeles Unified School District's long-term debt (the "Debt Report"). It presents a complete picture of the District's indebtedness in the categories of General Obligation Bonds and Certificates of Participation¹. Sometimes referred to as "bonded indebtedness", long-term debt is typically used to finance capital projects with a long useful life. Issuing debt to pay for long-term assets is based upon the principle of matching the cost of acquiring the asset to the time period that taxpayers and the general community utilize those assets. The District strives to achieve an equitable balance between the debt burden to the community and the time frame over which the assets are to be used.

The vast majority of the District's capital projects fall within the new construction, modernization, technology and safety programs being financed with \$27.605 billion² of voter-approved General Obligation Bonds ("GOs"). The District also receives some State matching funds and other revenue sources to finance part of the GO bond program's projects. A relatively small number of projects have been financed with Certificates of Participation ("COPs") that are repaid from the General Fund.

This report uses the words "bonds" and "debt" interchangeably, even when the underlying obligation does not technically constitute "debt" under California's Constitution³. This conforms with market convention for the general use of the term "debt" and "debt service" as applied to a variety of instruments in the municipal market, regardless of their precise legal status. The rating agencies and investor community evaluate the District's debt position based on all of its outstanding obligations whether or not such obligations are "debt" as defined within the California Constitution context.

The District has a comprehensive Debt Management Policy designed to assure the District follows best practices when debt is issued. A copy of the Debt Management Policy appears as Appendix 5 to this Debt Report.

General Obligation Bonds represent debt that is paid from voter approved *ad valorem* property taxes that are levied and collected by the County of Los Angeles. The proceeds of such *ad valorem* property tax levies are neither received by nor under the control of the District. The District's taxpayers have shown a strong commitment to the District's capital program by approving six General Obligation Bond authorizations since 1997². A top priority of the District is to manage the issuance of these bonds in a manner that minimizes the tax rates paid by our taxpayers, which the District believes it has accomplished, as more fully detailed in this Debt Report.

COPs represent debt that is paid from revenues under the District's control, such as General Fund revenues. To assure that issuance of such debt is undertaken in a prudent manner that protects the District's instructional programs and operations, the Board of Education's Debt Management Policy prescribes limits to the amount and

¹ For purposes of this report, references to COPs also include the District's 2022 private placement lease agreement.

² Subsequent to the reporting period, on November 5, 2024, voters approved the District's Measure US, authorizing an additional \$9.0 billion of general obligation bonds, bringing the District's total authorization to \$36.605 billion.

³ "Debt" under the California Constitution excludes short-term obligations such as tax and revenue anticipation notes and lease transactions such as COPs.

type of COPs indebtedness that may be undertaken. This Debt Report provides a discussion of the District's COPs issuance, which is in compliance with policy limitations.

Both General Obligation Bonds and COPs are considered "direct debt" of the District and are also included in the measurement of "overall direct debt" issued by all local public agencies within the District's boundaries. It is important to monitor the levels and growth of direct debt and overall debt as they reflect the debt burden borne by our taxpayers and provide perspective on taxpayers' capacity for future additional debt.

When debt is issued, independent credit rating agencies evaluate the District's credit profile and assign a rating to the issue. Historically, the District's credit ratings on its GOs and COPs had been directly related to the financial condition and fiscal management of the District. However, following a 2016 legislative change, certain rating agencies' methodologies on California school district GOs changed as more fully discussed in Section IV. As of June 30, 2024, the District's GO bond ratings were AAA by Fitch Ratings, AAA by KBRA, Aa2 by Moody's Investors Service, and AA- by Standard & Poor's. In addition, as of June 30, 2024, the ratings on the District's COPs were A1 by Moody's Investors Service and A+ by Fitch Ratings. Regardless of each agency's specific methodology, all rating agencies provide commentary on the District's general fund credit characteristics. In the rating agencies' most recent reports from April 2025 they recognized the District's credit strengths as well as its weaknesses. They noted the District's "favorable financial performance" and "strong budget management track record." However, they also noted that the District's "financial operations are challenged as evidenced by continued deficit spending" and that there is "a need for future spending cuts". In terms of strengths, they highlighted the District's consistent financial performance driven by conservative budgeting practices, adopted policies and multi-year planning. However, they continue to note the District's challenges. To maintain its current ratings, the agencies have an expectation that the District will align operations and staffing levels with revenues to support stable operations. In terms of weaknesses, the rating agencies noted the District's ongoing enrollment declines, deficit spending pressures with projections of significantly reduced fund balances, inability to independently raise revenues and significant long-term liabilities, including pensions and OPEBs.

- Factors that can lead to an upgrade include i) maintenance of strong reserves; ii) elimination of projected operating deficits and reliance on one-time revenues to meet spending needs and iii) stabilized enrollment, with continued improvement in student attendance.
- Factors that can lead to a downgrade include i) reduction in reserves or liquidity significantly below current projections; ii) enrollment declines that exceed projections or are unaddressed by reductions in expenditures; and iii) significant increased leverage.

The ratings assigned to the District's GO bonds and COPs affect its interest payments and the cost to the District's taxpayers and the General Fund respectively. A history of the District's ratings is provided in this Debt Report.

I hope that the information in this Debt Report can be used to support the continued development of sound capital plans and for adherence to the District's finance and debt policies. I look forward to working with you in pursuing such capital plans, as they provide critical guidance for the protection of the District's infrastructure and assets. Together with sound capital planning, the District's debt and finance policies help to secure the District's fiscal strength in the years ahead.

If you have any questions or comments regarding this Debt Report, please contact my office at (213) 241-7888. Your input is important to us and would be greatly appreciated.

Sincerely,

Chris Mount-Benites
Chief Financial Officer

SECTION I: GENERAL OBLIGATION BOND DEBT

A. District's Bonded Debt Limitation and Assessed Valuation Growth

As specified in Education Code Section 15106, the District's bonded debt limitation (also known as general obligation bonding capacity) equals 2.5% of the value of taxable property (i.e., assessed valuation) in the District. For Fiscal Year 2023-24, total assessed valuation in the District was \$930.0 billion, resulting in a bonded debt limitation of \$23.2 billion. Table 1 presents the District's maximum debt limit versus outstanding debt as of June 30, 2024. The difference is the "Legal Debt Margin."

Table 1
Bonded Debt Limitation and Legal Debt Margin
As of June 30, 2024
(in thousands)

Total Assessed Valuation	<u>\$ 929,980,077</u>
Bonded Debt Limitation (2.5% times Assessed Valuation)	\$ 23,249,502
Less: Outstanding General Obligation Bonds	<u>(10,723,385)</u>
<i>Equals: Legal Debt Margin</i>	<u>\$ 12,526,117</u>

In addition to new District debt issuance and the amortization pattern of its outstanding debt, the Legal Debt Margin is affected by the assessed valuation growth in the District. Assessed valuation typically grows up to the maximum base annual rate of 2% allowed under Proposition 13 for existing property, with additional growth coming from new construction and the sale and exchange of property. Chart 1 on page 2 shows assessed valuation in the District from 1995 to 2024. Chart 2 shows the annual growth rate in assessed valuation in the District over the same period. The District's assessed valuation for Fiscal Year 2024-25, which is one year beyond the reporting period in this report, is at an all-time high of \$972.87 billion. The average growth rate has been 4.87% over the 30 years through FY 2023-24 and a higher 6.07% over the past 5 years.

Anticipated increases in future assessed valuation will permit issuance of new General Obligation Bonds to the extent that Proposition 39 tax rate limitations are not exceeded and bond proceeds on hand are sufficiently spent down. See Proposition 39 tax rate limitations in Section I.E.

B. Bonds Outstanding and Bonds Authorized But Unissued

As of June 30, 2024, the District had a total of \$10.723 billion of outstanding voter authorized General Obligation Bonds, for which a detailed listing and the debt service requirements can be found in Appendix 1-A and 1-B. In Fiscal Year 2023-24, the District issued \$850.0 million of General Obligation new money bonds.¹

The District had a total of \$8.699 billion of authorized but unissued General Obligation Bonds as of June 30, 2024. Table 2 presents overall highlights of the District's authorized but unissued bonds².

Table 2
Authorized but Unissued General Obligation Bonds
As of June 30, 2024
(in thousands)

	Voter Authorization Amount	Issued	Authorized but Unissued
Proposition BB	\$2,400,000	\$2,400,000	\$0
Measure K	3,350,000	3,350,000	0
Measure R	3,870,000	3,870,000	0
Measure Y	3,985,000	3,985,000	0
Measure Q	7,000,000	4,275,955	2,724,045
Measure RR	7,000,000	1,025,000	5,975,000
	\$27,605,000	\$18,905,955	\$8,699,045

C. Distribution of Bonds by Prepayment/Call Flexibility; General Obligation Bond Refundings

The District's outstanding General Obligation Bonds have varying degrees of prepayment or call flexibility. Chart 3 shows the District's outstanding General Obligation Bonds by call date that are: 1) non-callable, 2) eligible to be current refunded with tax-exempt bonds, and 3) eligible to be refunded with a make whole call. The General Obligation Bonds that have a make whole/extraordinary redemption feature represent special bond structures permitted under the American Reinvestment and Recovery Act (ARRA); see Section I.D - "Federal Tax Subsidy and Tax Credit Bonds." On December 2017, the Federal government enacted the Tax Cuts and Jobs Act (Public Law No: 115-97), which eliminated the ability of state and local governments to do advance refundings with tax-exempt bonds. The chart below reflects current tax law.

¹ Subsequent to the reporting period, the District issued \$1.100 billion of General Obligation Bonds, Series QRR (2024) on October 8, 2024. The Series QRR Bonds are comprised of \$525 million of Measure Q Bonds and \$575 million of Measure RR Bonds. Additionally, on May 13, 2025, the District issued \$948.345 million of General Obligation Bonds, comprised of \$700 million of Election of 2024, General Obligation Bonds, US Series A-1, A-2, and B, and \$248.345 million of 2025 General Obligation Refunding Bonds, Series A.

² Subsequent to the reporting period, on November 5, 2024, voters approved Measure US, which authorized the issuance of \$9.000 billion of General Obligation Bonds.

Chart 3
Distribution of Outstanding LAUSD G.O. Bonds
(by Call Date as of June 30, 2024)

The Chief Financial Officer regularly monitors market conditions for refunding opportunities. Pursuant to the Debt Management Policy, the District will not proceed with a tax-exempt refunding unless it generates at least 3% net present value savings for each maturity of bonds refunded and for which the net present value savings is greater than negative arbitrage except under certain circumstances. Alternative structures such as taxable advance refundings or tax-exempt forward refundings may be acceptable if the net present value savings is in excess of 5% on a maturity-by-maturity basis and/or other benefits to the District are identified by the Chief Financial Officer and the District's municipal advisor. Table 3 provides a summary of the savings from refundings that have been completed through June 30, 2024¹. These refundings are saving taxpayers approximately \$1.59 billion over the term of the bonds.

Table 3
Summary of General Obligation Refunding Bonds Savings
(As of June 30, 2024)

Refunding Bond Issue	Amount Refunded (millions)	Term of the Refunding Bonds (years)	Total Savings (millions)
2002	\$262.7	17	\$12.8
2004 A-1 & A-2	215.7	18	10.6
2005 A-1 & A-2	486.0	20	38.4
2006 A	131.9	13	6.3
2006 B	561.4	21	29.3
2007 A-1 & A-2	1,250.3	21	82.1
2007 B	25.8	12	1.8
2009 A	72.3	9	2.1
2010 A	72.8	5	2.4
2011 A-1 & A-2	425.6	13	37.9

¹ Subsequent to the reporting period, on May 13, 2025, the District issued \$248.345 million of 2025 General Obligation Refunding Bonds, Series A, which refunded \$218.030 million of outstanding GO bonds over 15 years, generating \$19.6 million in total savings.

2012 A	158.8	17	12.9
2014	1,706.4	17	171.6
2015	378.1	10	81.0
2016 A	661.2	14	126.6
2016 B	563.0	16	166.5
2017 A	1,271.2	10	258.4
2019 A	687.6	15	170.8
2020 A	379.7	13	135.3
2021 A	240.1	11	67.6
2021 B	46.4	7	5.9
2024 A	3,168.4	10	173.9
	<u>\$12,765.4</u>		<u>\$1,594.2</u>

D. Federal Tax Subsidy and Tax Credit Bonds

In Fiscal Year 2009-10, the District took advantage of new innovative bond programs available under the Federal government's American Reinvestment and Recovery Act (ARRA). These bond structures provided lower debt service than traditional tax-exempt bonds, with LAUSD achieving expected savings of \$1.1 billion.

One of the federal programs, Build America Bonds (BABs), was a taxable bond program for which the federal government initially subsidized 35% of the interest cost. The District sold about \$1.4 billion of taxable BABs in October 2009 and \$1.25 billion in March 2010. All of the District's \$2.6 billion of BABs were refunded with the issuance of the 2024 General Obligation Refunding Bonds, Series A on April 30, 2024. The District's only remaining Federal Tax Subsidy/Tax Credit Bonds are the General Obligation Bonds Election of 2005, Series J (2010) QSCBs, with \$290.2 million outstanding as of June 30, 2024. Another federal program used by LAUSD at that time is known as Qualified School Construction Bonds (QSCBs). These were also taxable bonds, however, under this structure, investors receive a tax credit against their federal income tax, with low or no interest payments. The District sold \$318.8 million of QSCBs to taxable investors in October 2009. The District also received a QSCB allocation of \$290.2 million for 2010 and, under new legislation enacted in March 2010, sold QSCBs in May 2010, as subsidized taxable rather than tax credit bonds.

Sequestration. On March 1, 2013, then-President Barack Obama signed an executive order (the "Sequestration Executive Order") to reduce budgetary authority in certain accounts subject to sequester in accordance with the Budget Control Act of 2011 and the American Taxpayer Relief Act of 2012. Pursuant to the Sequestration Executive Order, budget authority for all accounts in the domestic mandatory spending category including, among others, accounts for the payments to issuers of "Direct Pay Bonds," which includes the District's outstanding Series J (Qualified School Construction Bonds), are subject to sequestration. Direct Pay Bonds are issued as taxable bonds and provide credits to the District from the federal government pursuant to Section 54AA(d) and 54AA(g) of the Code.

Pursuant to the Bipartisan Budget Act of 2013, enacted in December 2013, the District's Direct Pay Bonds became subject to the full amount of sequestration budget cuts. The federal subsidy for the Direct Pay Bonds for the federal fiscal year ended September 30, 2023, was reduced by 5.7%, and the U.S. Treasury Department announced a decrease in subsidy amounts by 5.7% through federal fiscal year ending 2031. During the federal fiscal year ended September 30, 2024, the sequestration resulted in a reduction in the aggregate amount of approximately \$0.9 million with respect to the refundable credits for the Series J Bonds.

E. Tax Rate Performance on Outstanding Bonds

The Tax Rate Statements for the District's six GO Bond authorizations set forth various assumptions including the average annual assessed valuation growth over the life of the bonds, the average interest rate on the future bond issuances, and the estimated tax rates to be paid by District taxpayers to service the debt on the outstanding GO Bonds. The assumptions in the respective Tax Rate Statements are not technically binding on the District, as actual issuance patterns, interest rates, and the growth pattern of the assessed valuation base combine to determine the actual tax rates. Nevertheless, the District actively manages its bond issuance program so that actual tax rates are close to or lower than the tax rates set forth in each respective Tax Rate Statement.

Table 4 below summarizes the assumptions in the Tax Rate Statements for each of the six bond measures for the assessed valuation growth rate and the interest rates on the bond sales. It also provides the election date, amount approved, and election authorization.

Table 4
Summary of Tax Rate Performance Assumptions

	Election Date	Amount (billions)	Assumed Average Assessed Valuation Growth	Assumed Interest Rate	Type of Election
Proposition BB	04/08/97	\$2.400	2.0%	5.75%	Traditional 66 2/3 rd so% Minimum Approval
Measure K	11/05/02	3.350	3.9%	5.50%	Proposition 39 – 55%
Measure R	03/02/04	3.870	5.0%	5.25%	Proposition 39 – 55%
Measure Y	11/08/05	3.985	6.0%	5.25%	Proposition 39 – 55%
Measure Q	11/04/08	7.000	6.0%	5.25%	Proposition 39 – 55%
Measure RR	11/03/20	7.000	4.0%	4.00%	Proposition 39 – 55%

Table 5 on page 7 provides the assumptions included in the Tax Rate Statements for initial and future tax rates and actual results to date. Future tax rates will depend on a combination of additional bond issuance, future assessed valuation, and bond refundings. Chart 4, also on page 7, presents a history of the District's GO Bond tax rates by measure and in aggregate from FY1997-98 through FY2023-24.

Table 5
Estimated Tax Rates Set Forth in Tax Rate Statements for Measure BB, K, R, Y, Q and RR
(per \$100,000 of Assessed Valuation)

Tax Rate Description	Proposition BB		Measure K		Measure R		Measure Y		Measure Q		Measure RR

SECTION II: CERTIFICATES OF PARTICIPATION (“COPs”)

A. COPs Outstanding

Over the years, the District has issued COPs to fund a variety of capital projects needed, either prior to the voter approval of GO measures or that were not eligible for GO funding, including the construction of non-school facilities, equipment, and certain IT systems. While all COPs are legally secured by the District’s General Fund, debt service on certain COPs has been eligible to be repaid from other revenue sources when available. In the past, the District has strived to maximize the portion of its COPs debt service that is paid from non-General Fund sources, including using developer fees for debt service on projects related to enrollment growth or overcrowding and using cafeteria funds for cafeteria-related projects. The District has also prepaid COPs when possible with GO bond proceeds and other available funds, as described in the following Section II. B.

All of the District’s outstanding COPs were issued as fixed rate financings. As of June 30, 2024, a total of \$471.59 million of COPs were outstanding. The debt service requirements on outstanding COPs as of June 30, 2024, can be found in Appendix 2.

Table 6
Certificates of Participation Outstanding
As of June 30, 2024
(in thousands)

Issue Description	Date of Issue	Principal Amount Issued	Principal Outstanding	Final Maturity
COPs (Refunding, 2020 Series A)	10/27/2020	28,390	21,850	10/01/2034
COPs (Refunding, 2022 Lease Agreement)	08/30/2022	73,730	65,480	10/01/2030
COPs (2023 Series A) (Sustainability Bonds)	08/31/2023	384,260	384,260	10/01/2038
Total		\$486,380	\$471,590	

Chart 5 shows COPs debt service as of the close of Fiscal Year 2023-24. Debt service payments from the General Fund in Fiscal Year 2023-24 total \$645.3 million through final maturity.

Chart 5
Certificates of Participation Debt Service (Paid from General Fund)
(As of June 30, 2024)

B. COPs Refundings

As noted previously, the District relied on COPs in part to finance school facilities prior to the voter approval of its GO bond measures. Following voter approval, in Fiscal Years 2004-05 and 2005-06, the District used Measure R and Measure Y bond proceeds to defease \$143.42 million and \$177.95 million of COPs, respectively, providing direct General Fund savings. Similarly, in September 2010 and August 2014, the District used Measure Y bond proceeds, unspent project funds and other funds on hand with the COPs trustee to defease and/or prepay debt service payments on the 2007 Series A and 2009 Series A COPs relating to \$63.45 million of principal. In the past, the District has also used other available amounts such as one-time funds and shifted certain debt service payments to non-General Fund sources such as developer fees to reduce its General Fund COPs debt service.

Table 7 below presents a history of the District's COPs refundings¹.

Table 7
Los Angeles Unified School District
Summary of COPs Refundings

Issue Description	Date of Issue	Principal Amount Issued (thousands)	Refunded COPs	Term of Refunding COPs (Years)	Nominal Savings (thousands)
1991 Refunding COPs (Francisco Bravo Medical Magnet Senior High School)	11/13/91	\$46,110	1988 COPs	16.0	\$1,609.4

2013 Refunding Lease	06/24/13	24,780	2003B COPs	15.0	4,822.1
2014K General Obligation Bonds (Measure Y) ²	08/19/14	33,360	2007A and 2009A	5.5	35,338.6
2020A COPs Refunding	10/27/20	28,390	2010 B-1/B-2 COPs; 2013A	14.0	8,733.8
2022 Refunding Lease	8/30/22	73,730	2012A and 2012B Refunding COPs	8.0	11,255.5
Total					\$438,313.1

¹ Subsequent to the reporting period, on May 13, 2025, the District issued \$239.575 million of Election of 2024, General Obligation Bonds, US Series B (2025) Federally Taxable, which refunded \$218.030 million of outstanding Certificates of Participation, 2023 Series A (Sustainability Bonds) over 14 years, generating \$40.6 million in total savings.

² The 1993 Refunding COPs refunded the 1991 COPs (Capital Facilities Project) that funded the acquisition of the Ambassador Hotel site through eminent domain. The legal documents for the 1991 COPs provided that said COPs would be refunded within three years if title to the Ambassador Hotel site had not been obtained. Since title had not been obtained by the three-year mark, the District refunded the 1991 COPs. There were no savings associated with this refunding, as the transaction was done as a restructuring.

³ These GO bonds shifted the COPs debt service from the District's General Fund to taxpayers, thereby saving General Fund resources.

⁴ This series converted a prior fixed rate series to a variable rate structure. The District has indicated the savings for this transaction to be "not available" because future variable rates and ancillary costs could not be known with certainty at the time of the refunding and this table is meant to provide only actual savings.

⁵ The amortization of this series was 20 years versus the 12-year amortization of the refunded bonds, resulting in dissavings in the out years.

⁶ These series converted two prior variable rate series (2008A and B) to a fixed-rate structure and refunded two fixed rate series. The savings shown in the table are only the known savings from the fixed-rate refunding of the two prior fixed rate series (the 2001B and 2002C). Savings are considered "not available" on the variable to fixed rate series because future variable rates and ancillary costs could not be known with certainty at the time of the refunding. This table is meant to provide only actual savings.

SECTION III: THE MARKET FOR THE DISTRICT'S DEBT

A. Municipal Bond Market

The District's GO bonds, COPs, and tax and revenue anticipation notes ("TRANs") are issued and traded in the United States' municipal bond market. Major groups of investors in this market include tax-exempt bond funds, insurance companies, investment bank portfolios, trust departments, investment advisors, individual investors, and money market funds. The various market participants may have different preferences for the structure and maturities of the bonds, COPs or TRANs that they purchase. As one of the largest issuers of municipal bonds in the country, the District is able to draw significant attention from these investor groups. The table to the right is a listing of the largest institutional holders of the District's long-term bonds that are required to publicly report their holdings. These generally include bond funds, professional retail investors such separately managed accounts and insurance companies.

Largest Reported Institutional Holders of LAUSD Debt

Company	Thousands
Vanguard Group	\$1,097,689

Northwestern Mutual Investment Mgmt Co. LLC	25,000

Source: IPREO as of June 30, 2024

The District's borrowing costs reflect the interest rates the District achieves each time it sells bonds. Those rates are a function of many factors, including the credit ratings on the District's obligations, market interest rate levels, competing supply, investor asset levels, tax law, and anticipated Federal Reserve policy actions at the time of sale. These factors combine to determine the level of investor demand for the District's obligations and the interest rates achieved. For the District's voter approved general obligation bonds, an important credit factor is the fact the repayment of the bonds is from property taxes collected and held in trust by the County of Los Angeles. In addition, particularly on the COPs, an important determinant of the rates of return investors demand is their perception of the District's overall financial, debt and economic performance compared to other issuers. The investment community views the District's GOs as high-quality investment grade securities, owing to their repayment source and the vast local economy. The COPs which directly reflect the District's financial position are considered upper medium investment grade securities.

In addition to the federal tax-exemption available to all investors, the State's progressive income tax system provides in-state investors with additional incentives to purchase the District's tax-exempt GO bonds and COPs. We note that the Tax Reform and Jobs Act of 2017 (the "Act") had an impact on investor demand for tax-exempt bonds. On one hand, the Act capped the amount of property and income tax deductions that individuals can use to offset taxable income, which increased demand for tax-exempt obligations from investors in high tax states, such as California. On the other hand, the lower corporate tax rates reduced demand for tax-exempt obligations from banks. In addition, the interest rates on the District's and other local government issuers' bonds in California have also been subject to the State's fiscal position. Investor perception of the State's bonds had weakened significantly over a multi-year period beginning in 2009 due to the State's credit deterioration. During this period, the State's credit was downgraded by the three major rating agencies at that time to the lowest level of any state in the country and its borrowing costs relative to

other issuers rose dramatically. While not as dramatic, the State's credit issues had a direct impact on the borrowing costs of other issuers that were viewed as "agencies" of the State, such as LAUSD, even though the District's credit ratings remained well-above those of the State during that period. Over the last several years, however, the State's credit profile and credit ratings improved significantly. During this period, the Legislature passed on-time balanced budgets, the administration repaid a significant portion of its budgetary borrowings and the State built up its reserves. As a result, the State's credit ratings improved and its interest rates relative to national indices also improved dramatically. The State's improvement has in turn had a positive effect on interest rates for other California issuers associated with the State, including the District.

The District's interest rates are also subject to the broader financial market conditions. This was particularly apparent during the Great Recession and more recently, during the COVID-19 pandemic. During both the financial crisis and the early months of the COVID-19 pandemic, there were periods when market access became very restricted and with respect to the Great Recession, certain municipal products failed. While some products that had been common in the municipal market prior to the Great Recession, such as auction rate securities and AAA-rated bond insurance, are no longer available, the municipal market recovered following the Great Recession. In addition, following intervention by the federal government to address COVID-19 in spring 2020, access to the municipal market normalized and interest rates remained low throughout fiscal year 2020-21. More recently, starting in March 2022, to combat inflation, the Federal Reserve Board has increased the Federal Funds interest rate eleven times totaling 525 basis points. This in turn impacts the District's cost of funds. The 25-year tax-exempt interest rate index, MMD, rose 116 basis points through the same period. While rates remained elevated during the reporting period for this report, the Federal Reserve Board, citing progress on its goal of combatting inflation, began interest rate cuts in September 2024, with consecutive decreases of 50, 25, and 25 basis points through December 2024.

B. Cost of the District's Debt; No Variable Rate Debt Outstanding¹

B-1. Fixed Rate Debt

As of June 30, 2024, all of the District's General Obligation Bond and COPs issues carry fixed interest rates. Since reaching a cyclical high in 1999, tax-exempt fixed interest rates saw a significant move lower through the end of 2021, allowing the District to achieve very low interest costs during this period. Tax-exempt rates have since rebounded higher following the Federal Reserve Board's interest rate hikes, which started in the first quarter of 2022, as shown in Chart 6. The chart includes the Bond Buyer 20-Bond Index which consists of 20 General Obligation Bonds that mature in 20 years. The average rating of the 20 bonds is roughly equivalent to Moody's Investors Service's Aa2 rating and Standard & Poor's AA rating. The District's new money bonds have typically been structured with a term to maturity of 25 years so, *ceteris paribus*, one would expect their True Interest Costs ("TICs") to be above the Index; however, yields on the District's issues tend to be similar to the Index. In addition, the District's TICs on its two QSCB issues in 2009 and 2010 were well below the Index due to the heavily subsidized interest rate provided under the QSCB program. A listing of the TICs for each series of 25-year General Obligation Bonds sold by the District is provided in Appendix 1-A.

¹ Subsequent to the reporting period, the District issued three series of variable rate TRANs as interim financing vehicles, totaling approximately \$70.0 million.

Chart 6
True Interest Cost ("TIC") Rates on Actual LAUSD 25-Year G.O. Bond Issues
vs.
The Bond Buyer 20-Bond Index for G.O. Bonds

* The two low TIC outliers are the Election of 2005, Series H (2009) and Series J (2010) Qualified School Construction Bonds (Tax Credit Bonds)

** The Series QRR (2024) General Obligation Bonds were issued subsequent to the reporting period on October 8, 2024.

B-2. Variable Rate Debt

Current statutory provisions make it impractical for the District to issue variable rate General Obligation Bonds, as ancillary costs, such as remarketing fees and liquidity fees, cannot be paid from voter approved *ad valorem* property tax levies. Thus, while the vast majority of the District's debt has necessarily been issued as fixed rate bonds, the District has issued COPs in a variable rate mode from time to time. Variable rate COPs provide the District with the flexibility to prepay or restructure a portion of its debt and serves as a natural hedge to variable rate earnings. As of June 30, 2024, however, the District has no outstanding variable rate COPs.

SECTION IV: THE DISTRICT'S CREDIT RATINGS

A. Long-Term Credit Ratings on General Obligation Bonds and Certificates of Participation

Long-term credit ratings provided by a rating agency are an independent assessment of the relative credit risk associated with purchasing and holding a particular bond through its scheduled term of repayment. They serve as independent opinions of a borrower's financial strength and ability to repay its debt on a timely basis. Long-term credit ratings are one of the most important indicators of creditworthiness readily available to the investment community and have a direct impact on the borrowing rates paid by the District.

In July 2015, the California legislature enacted Senate Bill 222 ("SB222"), which became effective on January 1, 2016. SB222 established a statutory lien on the voter-approved property taxes that secure California school districts' General Obligation Bonds. Beginning with the March 1, 2016 GO bond sale, LAUSD capitalized on the legislative change and pursued ratings from Fitch Ratings ("Fitch") and Kroll Bond Rating Agency ("KBRA"), in addition to Moody's Investors Services ("Moody's") that had traditionally rated the District's GOs.

In April 2024, two rating agencies made changes to the District's credit ratings: Moody's upgraded the District's GO bonds rating from Aa3 to Aa2, its issuer default rating from A1 to Aa3, and its COPs rating from A2 to A1; Fitch Ratings upgraded the District's issuer default rating from A to AA- and its COPs rating from A- to A+. As of June 30, 2024, the District's GO bond ratings were AAA from Fitch, AAA from KBRA, AA- from Standard & Poor's, and Aa2 from Moody's. Fitch also provided the District with an Issuer Default Rating ("IDR") of "AA-" which is based on the District's financial operations. The distinction between the "AAA" rating on the GO Bonds and the "A" IDR reflects Fitch's assessment that the GO bondholders are "legally insulated from any operating risk of the District". As of June 30, 2024, any outstanding GO Bonds issued prior to Fiscal Year 2015-16 also have ratings of AA- by Standard & Poor's (S&P).

Depending on the rating agency and its methodology, as of June 30, 2024, the District's General Obligation Bond ratings are considered "best quality" or "high quality" as shown in Table 8. As of June 30, 2024, the District's COPs are currently rated A1 by Moody's and A+ by Fitch, which is considered "upper medium grade." Moody's, S&P and Fitch generally rate General Obligation Bonds several notches higher, due to the superior credit strength of the *ad valorem* property taxes pledged to repay General Obligation Bonds versus the General Fund pledge that supports repayment of COPs. As of June 30, 2024, Kroll does not rate the District's outstanding COPs. A history of the District's General Obligation Bond and COPs ratings is presented in Appendix 3.

In addition to the rating itself, each rating agency publishes an outlook on the rating. Outlooks are either "Positive", "Stable" or "Negative." A "Positive" outlook indicates a possible upgrade in the rating may occur; a "Negative" outlook indicates that a possible rating downgrade may occur; and a "Stable" outlook indicates that neither an upgrade nor a downgrade is anticipated. As of June 30, 2024, the District had a Stable outlook from all rating agencies.

Table 8 Credit Ratings (as of June 30, 2024)				
(District's GO Bond Ratings Highlighted in Red)				
(District's COPs Ratings Highlighted in Blue)				
	Moody's	Fitch	KBRA	S&P
Best Quality	Aaa	AAA	AAA	AAA
High Quality	Aa1	AA+	AA+	AA+
	Aa2	AA	AA	AA
	Aa3	AA-	AA-	AA-
Upper Medium Grade	A1	A+	A+	A+
	A2	A	A	A
	A3	A-	A-	A-
Medium Grade	Baa1	BBB+	BBB+	BBB+
	Baa2	BBB	BBB	BBB
	Baa3	BBB-	BBB-	BBB-
Below Investment Grade	Ba1 and Lower	BB+ and Lower	BB+ and Lower	BB+ and Lower
S&P rates COPs one notch lower than its rating on General Obligation Bonds, whereas Moody's rates COPs two notches lower than its rating on General Obligation Bonds.				

Recognizing the importance of high-quality ratings, the Board of Education adopted a Budget and Finance Policy that, among other things, establishes a minimum 5% General Fund reserve effective July 1, 2005. The District has updated the Budget and Finance Policy to establish annual contributions to an Other-Post-Employment Benefit (OPEB) trust, including an increased contribution when unrestricted fund balance exceeds 5% of revenues.

B. Short-Term Credit Ratings on Tax and Revenue Anticipation Notes

The District evaluates its monthly General Fund cash position as part of its cash management program's policy of ensuring timely payment of all operational expenses. It issued tax and revenue anticipation notes each Fiscal Year from Fiscal Year 1991-92 through Fiscal Year 2012-13 to finance periodic cash flow deficits and manage its cash flow needs. The District has always received the highest possible short-term ratings from Moody's (MIG 1) and S&P (SP-1+) on its TRANs and has always timely repaid its TRANs. The District has not issued TRANs for cashflow purposes since Fiscal Year 2012-13¹.

SECTION V: DEBT RATIOS

A. Use of Debt Ratios

Pursuant to the District's Debt Management Policy set forth in Appendix 5, the Chief Financial Officer calculates certain debt factors and debt burden ratios, compares them to benchmarks, and reports the results in this Debt Report. Measuring the District's debt performance through the use of debt ratios provides a convenient way to compare the District to other borrowers. The most common debt ratios applied to school districts are:

- ☐ Ratio of Annual Lease Debt Service to General Fund Expenditures. The formula for this computation is annual lease debt service expenditures divided by General Funds (i.e., General and Debt Service Funds) expenditures (excluding interfund transfers) as reported in the most recent Audited Annual Financial Report.
- ☐ Proportion of Fixed-Rate and Variable-Rate COPs Issues. The Debt Management Policy requires the District to keep its variable rate exposure, to the extent not hedged or swapped to a fixed rate, at or below \$100 million. If variable rate debt is issued, the Chief Financial Officer periodically, but at least annually, determines whether it is appropriate to convert the debt to fixed interest rates. Such conversions were executed in Fiscal Year 2011-12.
- ☐ Ratio of Outstanding Debt to Assessed Value. The formula for this computation is contained in Section 15106 of the Education Code. The ratio is calculated for both "Direct Debt" (i.e., General Obligation Bonds) and "Combined Direct Debt" (both General Obligation Bonds and COPs), the latter commonly referred to as "Debt Burden" in the California Municipal Statistics Overlapping Debt Statement. In addition, the ratio "Overall Debt Burden" includes the District's Direct Debt plus the Direct Debt of issuers whose boundaries overlap those of the District. It is important to monitor the levels and growth of Direct Debt and Overall Direct Debt as they portray the debt burden borne by the District's taxpayers and serve as proxies for taxpayer capacity to take on additional debt in the future. A summary of overlapping debt in the District is set forth in Appendix 4.

¹ Subsequent to the reporting period, the District issued three series of variable rate TRANs as interim financing vehicles, totaling approximately \$70.0 million.

B. LAUSD's Compliance with Debt Management Policy;

Table 9 provides a summary of the District's performance against policy maximums for debt paid from General Fund or other resources controlled by the District, such as developer fees. The District's policy calls for such annual debt service to be no more than 2% of General Fund Expenditures. Fiscal Year 2023-24 COPs debt service was \$13.8 million and future maximum annual COPs debt service is \$50.2 million (2024-25). The District's actual performance is well within the policy ceilings for its COPs gross debt service and any unhedged variable rate obligations.

Table 9
Policy Benchmarks, Targets and Ceilings for Debt Paid
From General Fund or Other Resources (COPs)
(As of June 30, 2024)

Factor	Maximum	LAUSD Actual	Over (Under) Policy Ceiling
Maximum COPs Gross Debt Service Limit	2% of General Fund Expenditures (FY2023-24)	0.48%	(1.52%)
Unhedged Variable Rate Debt	\$100 million	\$0	(\$100 million)

APPENDIX 1-A

Los Angeles Unified School District
General Obligation Bond Issuance and True Interest Cost
As of June 30, 2024¹

2023	Aa3	AAA	AAA	AA-	A2	Not rated	Not rated
2024 ⁶	Aa2	AAA	AAA	AA-	A1	A+	Not rated

¹ Beginning in 2001, Standard and Poor's began to rate lease obligations only one notch (rather than the previous two notches) lower than the issuer's General Obligation Bond rating.

² Moody's implemented a migration of its rating scale that resulted in the indicated changes to the District's ratings on April 2010.

³ In July 2015, the California legislature enacted Senate Bill 222 ("SB222") which became effective in January 2016. SB222 established a statutory lien in the voter-approved property taxes that secure California school districts' General Obligation Bonds. LAUSD capitalized on the legislative change and pursued ratings from two different rating agencies, Fitch and KBRA, in addition to Moody's that has traditionally rated the District's GOs.

⁴ In August 2019, based on their updated analysis of the legal framework for school district bankruptcies in California, KBRA upgraded the LAUSD GO bonds it rates to AAA.

⁵ In January 2021, Moody's revised its rating methodology for K-12 schools. Under the new methodology, Moody's provides both a general obligation bond rating and an issuer credit rating to school districts nationally. In addition to affirming the District's General Obligation bond rating of Aa3, at the time it released the new methodology, Moody's also provided the District with an Issuer Rating of A1. The higher rating for the District's General Obligation bonds versus its Issuer Rating reflects its security structure, which relies on voter approved property taxes as the debt service repayment source.

⁶ In August 2023, Fitch resumed rating the District's COPs, assigning a rating of A-. In April 2024, Fitch upgraded the District's COPs rating and Issuer Default Rating due to a criteria change. Concurrently, Moody's upgraded the District's GOs, COPs, and Issuer Default Ratings due to "consistent financial performance driven by conservative budgeting practices and multiyear planning."

APPENDIX 4

Los Angeles Unified School District Statement of Overlapping Debt As of June 30, 2024

Overlapping Debt Obligations

Set forth on the following page is the report prepared by California Municipal Statistics Inc. which provides information with respect to direct and overlapping debt within the District as of June 30, 2024 (the “Overlapping Debt Report”). The Overlapping Debt Report is included for general information purposes only. The District has not reviewed the Overlapping Debt Report for completeness or accuracy and makes no representations in connection therewith. The Overlapping Debt Report generally includes long-term obligations sold in the public credit markets by public agencies whose boundaries overlap the boundaries of the District. Such long-term obligations generally are not payable from revenues of the District (except as indicated) nor are they necessarily obligations secured by land within the District. In many cases, long-term obligations issued by a public agency are payable only from the General Fund or other revenues of such public agency.

The first column in the Overlapping Debt Report names each public agency which has outstanding debt as of the date of the report and whose territory overlaps the District in whole or in part. Column 2 shows the percentage of each overlapping agency’s assessed value located within the boundaries of the District. This percentage, multiplied by the total outstanding debt of each overlapping agency (which is not shown in Overlapping Debt Report) produces the amount shown in Column 3, which is the apportionment of each overlapping agency’s outstanding debt to taxable property in the District.

Los Angeles Unified School District
Schedule of Direct and Overlapping Bonded Debt
Year Ended June 30, 2024
(Unaudited)

Government	% Applicable	Amount Applicable
