Board of Education Report

File #: Res-048-25/26, Version: 1

Agenda Date: 3/10/2026

In Control: Board of Education

Mr. Melvoin, Ms. Griego, Ms. Ortiz Franklin - Using Technology with Intention: Establishing Guidelines for Student Screen Time (Res-048-25/26) (For Action April 21, 2026)

Whereas, The Los Angeles Unified School District (District) strives to prepare every child for success in college and career, and, in doing so, must adapt its instructional strategies to support both the academic progress and the socio-emotional wellbeing of students in an evolving world;

Whereas, Providing access to devices including laptops, tablets, and computers has expanded students' and families' ability to engage with online resources and support, and helped to eliminate gaps in digital access;

Whereas, The District provides students with access to digital instructional tools to support their learning. Students and teachers utilize District devices-including Chromebooks and iPads-during the school day to access a variety of online programs, individualized interventions, word processing tools, and assessments;

Whereas, While access to and developing skills in technology are critical in a digital world, excessive screen time can be associated with vision problems, increased anxiety and depression, addictive behavior, reduced attention span, difficulty managing emotions, lower academic achievement, and weaker cognition according to the American Academy of Pediatrics;

Whereas, A growing body of research indicates that excessive and unstructured screen use can negatively impact student attention, mental health, and overall wellbeing and can be particularly harmful for younger students. Research indicates that children 8 to 11 years old who exceed screen time recommendations are at higher risk for obesity and depressive symptoms and have scored lower on cognitive assessments;

Whereas, The Center for Disease Control's National Center's Health Interview Study found that, during July 2021 through December 2023, one-half of teenagers ages 12-17 had four hours or more of daily screen time;

Whereas, Excessive and unregulated screen time could lead to student data privacy concerns, increased exposure to cyberbullying and online harassment, and could contribute to unsupervised or inappropriate use of artificial intelligence tools and chatbots;

Whereas, Addiction-like use of short-form video content-including YouTube and social media platforms -are correlated with higher levels of social anxiety among adolescents. The earlier age of first use and higher frequency of usage are significantly associated with increased emotional and behavioral issues and most negatively impacts middle school students. These harms mirror those posed by social media use on cell phones-which the District was a leader in banning last year;

Whereas, To combat the negative effects of excessive screen time during the school day, some schools and districts have implemented low-to-no screen initiatives. Some have also taken steps to ban YouTube and limit student access during the school day. For example, Stamford Public Schools in Connecticut, Greenville County Schools in South Carolina, and Howard County Public Schools in Maryland block student access to YouTube on District devices, while still allowing teachers to utilize for instruction;

Whereas, The District has released guidance for schools focused on screen value and digital balance to ensure that technology use is purposeful, balanced, and equitable for every student. The District also requires students to sign the Responsible Use Policy (RUP) and complete a digital citizenship course;

Whereas, The District currently recommends that students complete approximately 45 minutes of English Language Arts and Math personalized learning lessons on the i-Ready platform weekly. However, the District does not have a policy that details the recommended and maximum amount of total screen time for students on District devices within the school day;

Whereas, Student screen time on District devices is not regularly tracked, disaggregated by application and/or grade level, and shared with parents, teachers, and administrators to inform instruction and curb excessive screen time; and

Whereas, Starting in the 25-26 school year, the District released a new Consent to Use Digital Tools form that describes “Non-Core Services” offered by Google, addresses data sharing, and requires families to opt in to having their child use all of the digital instructional tools noted. Families cannot yet opt out of specific programs or applications listed; now, therefore, be it

Resolved, That the Los Angeles Unified School District (District) commits to ongoing practices and policies that balance the benefits of instructional technology with the harms of excessive screen time;

Resolved further, That the District shall develop a Screen Time Policy (policy)-guided by an overarching vision and mission for appropriate technology use in the classroom-to be presented at the Committee of the Whole and brought to the Governing Board of the Los Angeles Unified School District (Board) for approval by June 2026, and to be implemented by school year 2026-27. The policy shall:

- Be informed by research, best practices, and input from experts in the field, labor partners, staff, educators, students, and parents and include recommendations and guardrails for screen time usage by grade level and subject, and student disability category (e.g., no device use during Physical Education courses or differentiated screen time for a student on the autism spectrum);
- Address equity and access considerations and include recommendations and guardrails on the use of laptop carts, one-to-one devices, active screen time, and passive screen time;
- Provide expected and maximum daily and weekly screen time limits for students delineated by grade level (e.g., no more than one hour total a day or 5 total hours per week for 3-5th graders);
- Consider eliminating the use of digital devices-including one-to-one tablets and laptops-for early education through second grade except for District-mandated formative assessments;

- Consider prohibiting elementary and middle school student device use during passing periods, lunch, and recess;
- Consider prohibiting and/or limiting students' use of YouTube on District provided devices;
- Clarify opt-out procedures for technology use during the school day;
- Operationalize how parents and guardians can annually consent/opt-in for each Google application on the Consent to Use Digital Tools form rather than submit a blanket opt-in for all applications listed;
- Encourage the use of paper and pen assignments;
- Provide recommendations and strategies to safely prepare students to utilize and/or create digital tools;
- Develop and share schoolwide guidance outlining best practices for reducing and monitoring student screen time-including systematic coordination among teachers-to prevent excessive cumulative screentime;
- Be reviewed annually at a public meeting of the Board;

Resolved further, That in addition to the policy, the District shall also present a comprehensive itemized report of contracts related to classroom technology, including but not limited to the purchase, maintenance, and upkeep of one-to-one digital devices, software, digital tools, and applications;

Resolved further, That the District shall update and annually review the Responsible Use Policy (RUP), the student and family consent form, and associated training to make them more developmentally appropriate;

Resolved further, That the District shall update and annually review the "Guidelines for the Authorized Use of Artificial Intelligence (AI) for District Employees, Students, and Associated Persons" to address procedures, policies, and safety measures given the changing landscape;

Resolved further, That the District shall conduct a review of all its current systems and process, both internal and external, to determine how to regularly track and report students' time spent on one-to-one devices districtwide, disaggregated by grade level, Board District, and specific online applications. Screen time usage reports should:

- Include school hours as well as time spent on one-to-one devices after school to evaluate overall screen time usage on campus and be distributed to the Board of Education (Board) quarterly;
- Be regularly shared with school administrators and teachers to guide instructional practices;
- Be regularly provided to parents with their child's weekly online activity report, similar to the Schoology digest currently provided; and, be it finally

Resolved, That the District shall provide parents and families with information, tools, and resources associated with the risks of screen addiction, how to combat it, and the importance of digital citizenship and safety.
